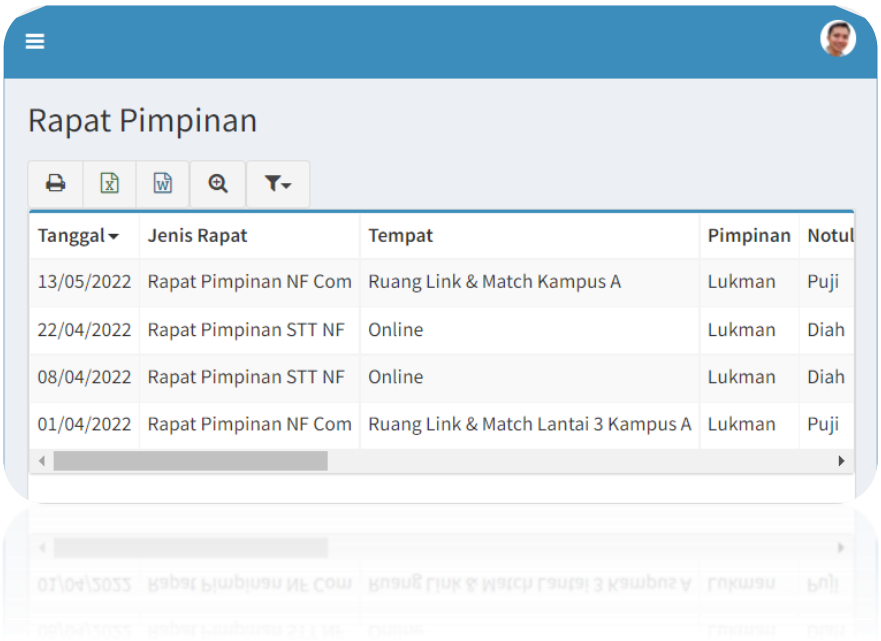
SIRA

(SISTEM INFORMASI RAPAT)



Abstrak

Sistem Informasi Rapat adalah aplikasi sistem informasi yang berfungsi mentransformasi dokumentasi kegiatan rapat-rapat menjadi bersifat online terpusat, memudahkan distribusi dan akses hasil rapat ke semua *stakeholder* rapat, memudahkan pencarian dan *follow up* terhadap hasil pembahasan dan keputusan dari rapat-rapat yang telah dilaksanakan, serta menyediakan data hasil rapat untuk proses *data analytic* guna bahan evaluasi dan perumusan strategi intitusi di masa depan.

Lukman Rosyidi
lukman@nurulfikri.ac.id

I. Pendahuluan

Rapat merupakan kegiatan sentral dalam organisasi yang sangat berperan penting dalam semua tahapan proses manajemen (*planning*, *staffing*, *organizing*, *staffing*, *leading*, dan *controlling*) dan di semua level struktur manajemen. Kegiatan rapat dapat memberikan hasil berupa laporan dan keputusan yang perlu mendapatkan *follow up* dan dievaluasi.

Pengadaan sistem informasi rapat yang berbasis teknologi informasi menjadi sangat diperlukan untuk mengatasi permasalahan sebagai berikut.

1. Dokumentasi secara pencatatan manual / file sulit untuk didistribusikan dan diakses dengan mudah oleh pihak-pihak yang berkepentingan.
2. Dokumentasi secara digital dengan penyimpanan dokumen di *cloud* menjadikan dokumen rapat menjadi tersebar, sulit diintegrasikan dengan sistem informasi lain, dan tidak mendukung *data analytic*.

Dalam hal ini, diperlukan suatu Sistem Informasi Rapat.

II. Tujuan

Tujuan pengembangan Sistem Informasi Rapat adalah sebagai berikut:

1. Mentransformasi dokumentasi kegiatan rapat-rapat menjadi bersifat **online, tersistem dan terpusat**.
2. Memudahkan distribusi dan akses hasil rapat ke semua *stakeholder* rapat.
3. Memudahkan pencarian dan *follow up* terhadap hasil pembahasan dan keputusan dari rapat-rapat yang telah dilaksanakan.
4. Menyediakan data hasil rapat untuk proses *data analytic* guna bahan evaluasi dan perumusan strategi intitusi di masa depan.

III. Ruang Lingkup

Ruang lingkup proses bisnis yang dilakukan dalam Sistem Informasi Rapat adalah sebagai berikut:

1. Sistem informasi ini mengakomodir dokumentasi rapat sebagai berikut.
    a) Rapat internal satuan kerja
    b) Rapat antar satuan kerja
    c) Rapat pimpinan seluruh satuan kerja
2. Sistem ini dikembangkan untuk diakses menggunakan web browser Firefox dan Chrome.

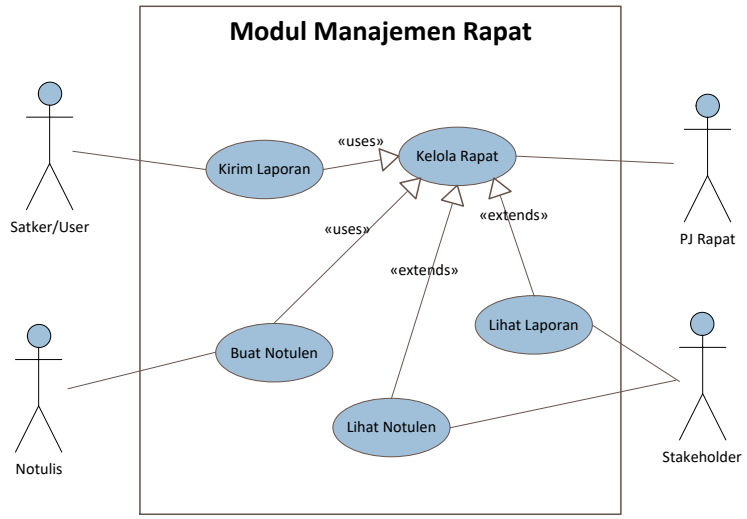
3. Fitur tambahan yang disediakan:
    a. Ekspor data rapat dan notulen rapat ke file Microsoft Word/Excel
    b. Pencarian event rapat berdasarkan jenis atau tanggal atau peserta tertentu

IV. Ikhtisar Sistem

Sistem Informasi Rapat ini mentransformasikan proses pencatatan dan dokumentasi Rapat ke dalam bentuk sistem informasi berbasis web. Modul ini mencakup fungsi utama sebagai berikut.

1. Menyediakan fasilitas bagi notulis rapat untuk mencatat notulen rapat.
2. Menyediakan fasilitas bagi setiap stakeholder institutisi yang terkait untuk melihat laporan dan notulen yang telah dibuat beserta dokuemen lampirannya.

Diagram *use case* Sistem Informasi Rapat adalah sebagai berikut.



Penjelasan proses sebagai berikut.

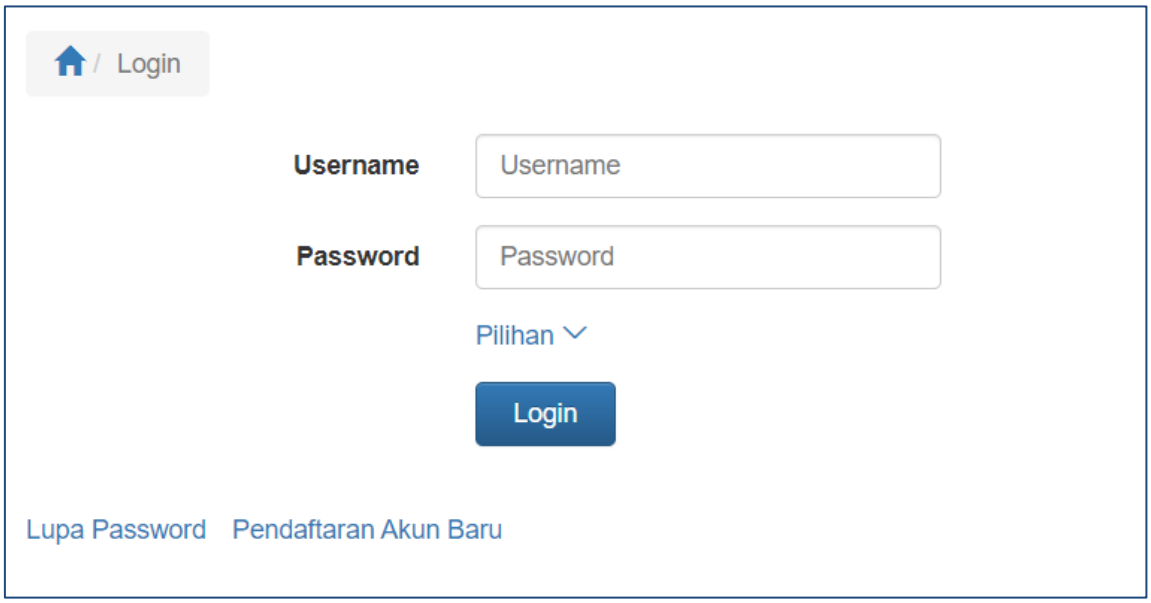
1. Penanggung jawab rapat melakukan input event rapat pada tanggal, tempat, dan dengan peserta rapat yang telah ditentukan pada sistem
2. Pada saat rapat, Notulis memverifikasi kehadiran peserta rapat dan menambahkan notulensi rapat yang berisi informasi:
    a. Satuan kerja/peserta rapat yang melakukan pembahasan
    b. Isi pembahasan, baik berupa pemberitahuan, diskusi, tanggapan, maupun keputusan
    c. Satuan kerja yang kemudian harus mekaukan follow up terhadap hasil pembahasan (opsional)

3. Semua stakeholder terkait kemudian dapat mengakses notulensi rapat berdasarkan link yang dishare oleh Notulis sesuai dengan hak akses jenis rapat

V. Panduan Penggunaan

Berikut panduan penggunaan Sistem Informasi Rapat.

A. Login Pengguna



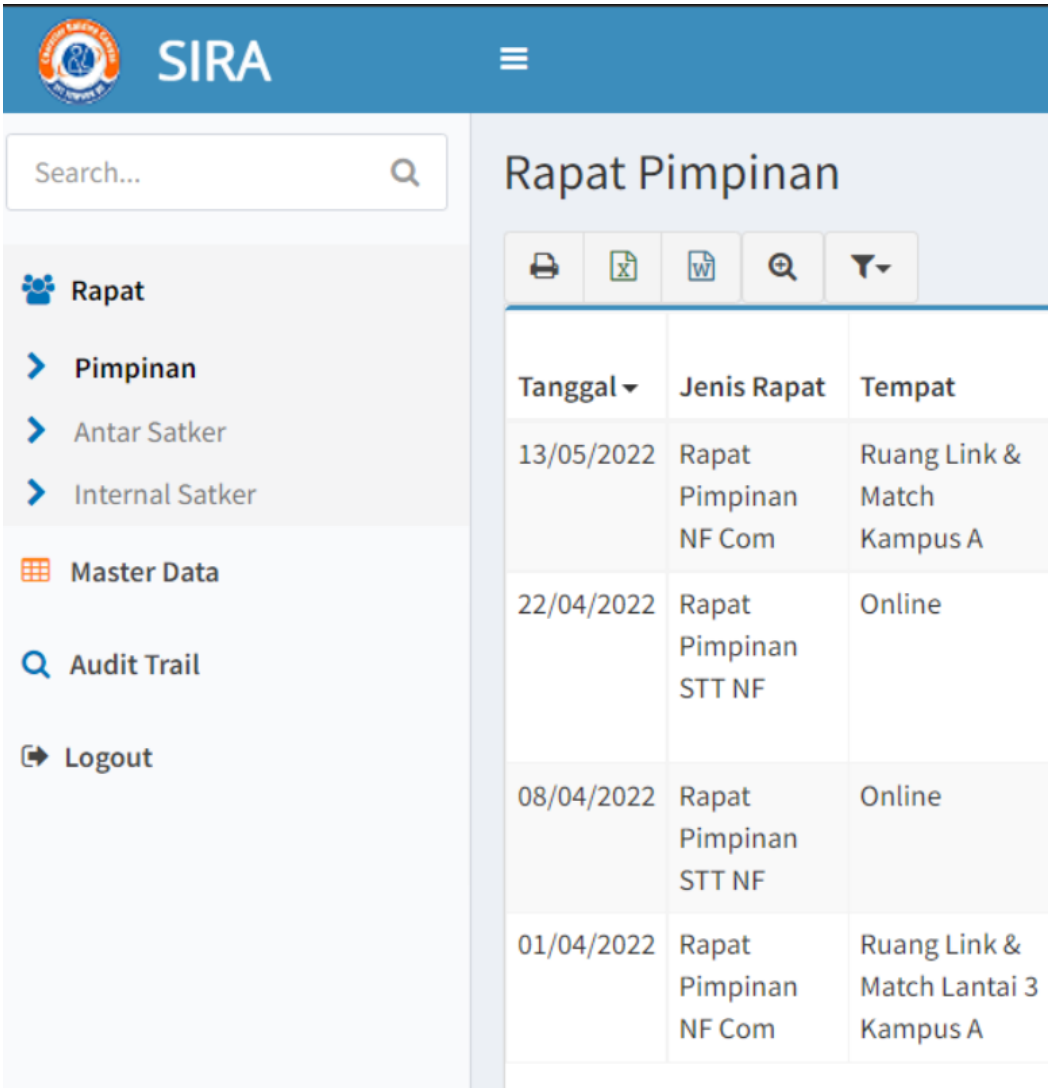
1. Bagi pengguna baru, lakukan pendaftaran akun yang akan mengisi data username, password, nama pengguna dan nama satker, serta nomor kontak dan email. Admin sistem akan memverifikasi akun dan mengaktifkan akun serta menentukan role dari pengguna.
2. Bagi pengguna yang sudah terdaftar dan diaktifkan, dapat langsung login login dengan Penggunaname dan password yang sudah dibuat. Apabila terlupa, maka pengguna dapat memanfaatkan fasilitas Lupa Password untuk dapat melakukan reset password lewat email yang sudah didaftarkan.

B. Memilih Jenis Rapat (semua pengguna)

Semua pengguna dapat memilih jenis rapat di menu sebelah kiri. Terdapat 3 jenis rapat:

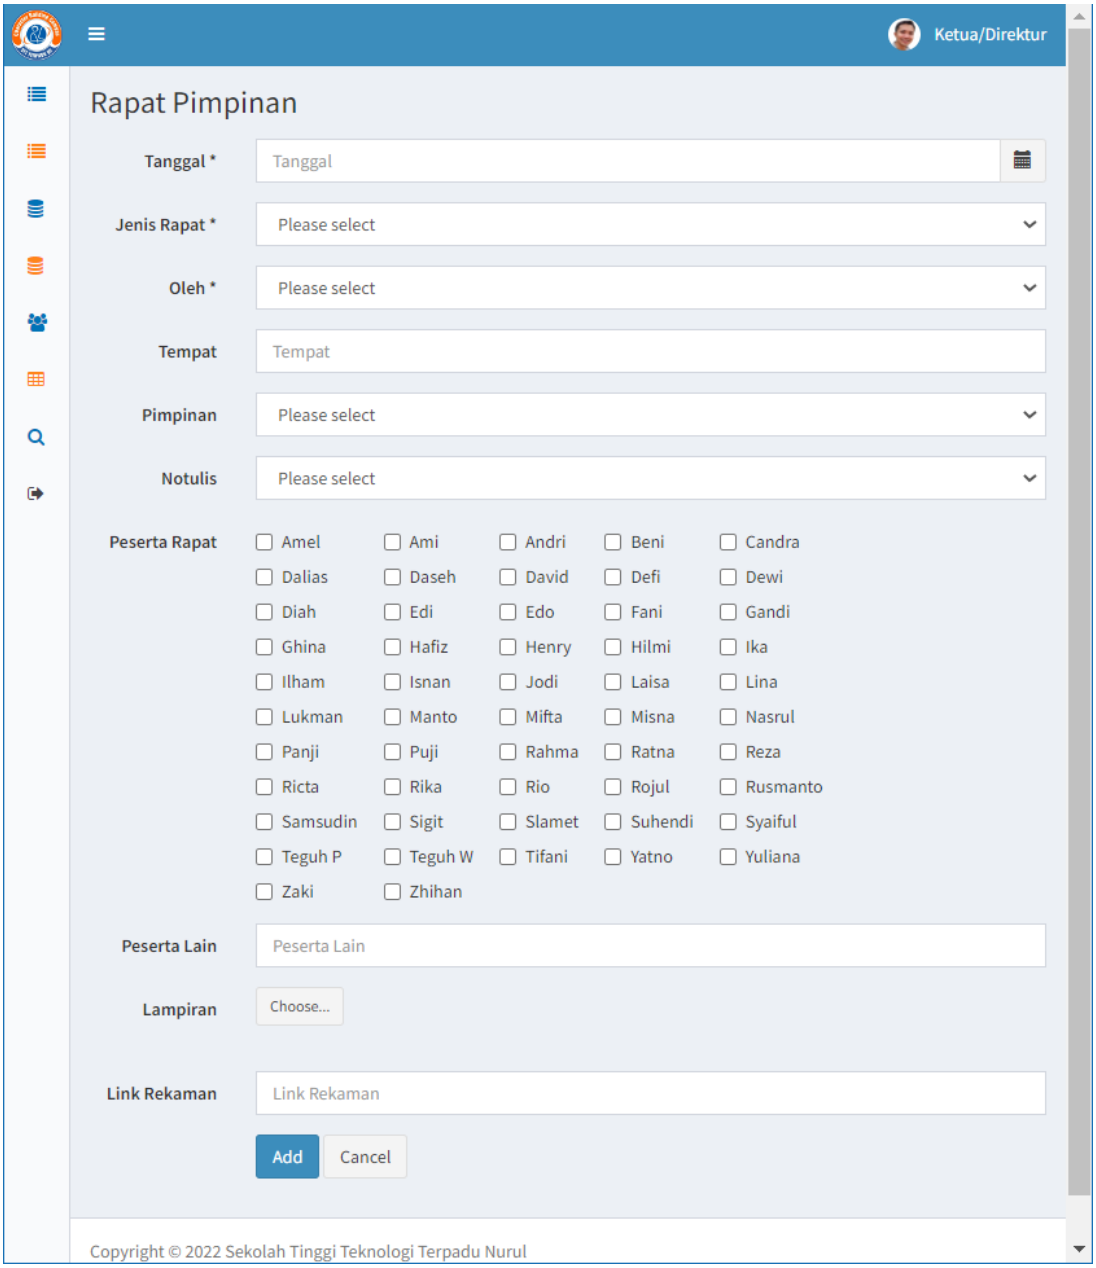
1. Rapat Pimpinan:
   - hanya bisa dibuat oleh satker Kesekretariatan/SDM
   - notulen rapat dapat dilihat oleh semua pimpinan/perwakilan satker
2. Rapat Antar Satker
   - bisa dibuat oleh semua satker
   - notulen rapat dapat dilihat oleh semua pimpinan/perwakilan satker

3. Rapat Internal Satker
    - bisa dibuat oleh semua satker
    - notulen rapat dapat dilihat oleh satker yang membuat rapat beserta atasannya



C. Membuat Catatan Event Rapat (Pengguna PJ Rapat)

Bagi pengguna PJ Rapat, membuat catatan event rapat dapat dilakukan dengan klik Add pada tampilan salah satu jenis Rapat. Ketersediaan tombol Add memperhatikan *privilege* pengguna sesuai dengan jenis Rapat.



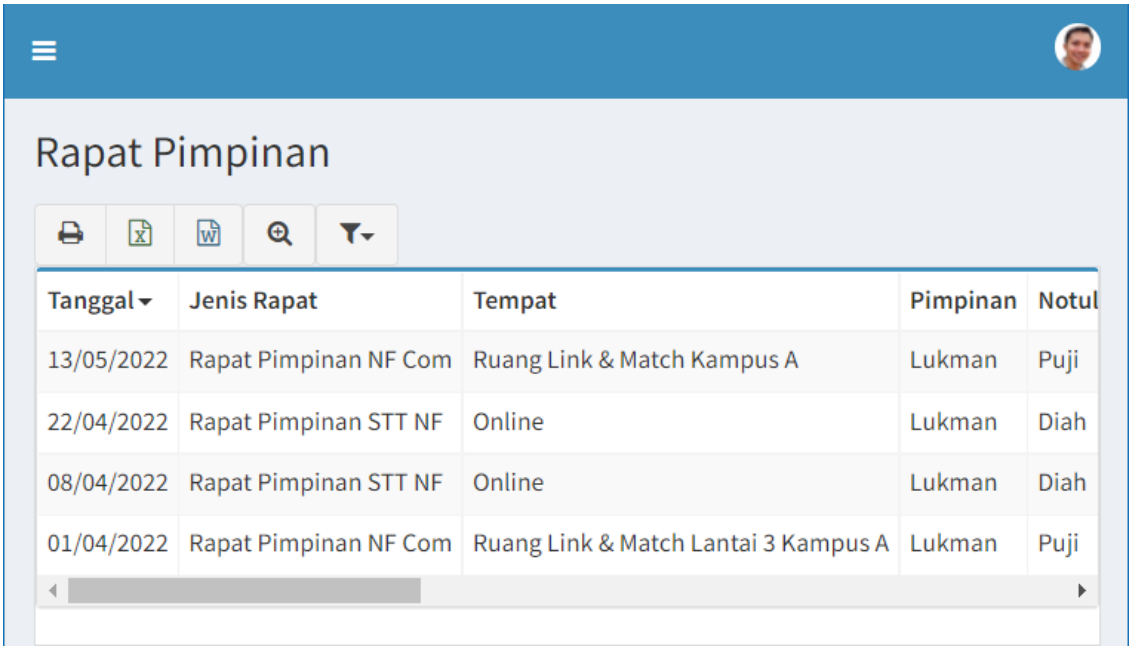
Untuk membuat catatan event Rapat:

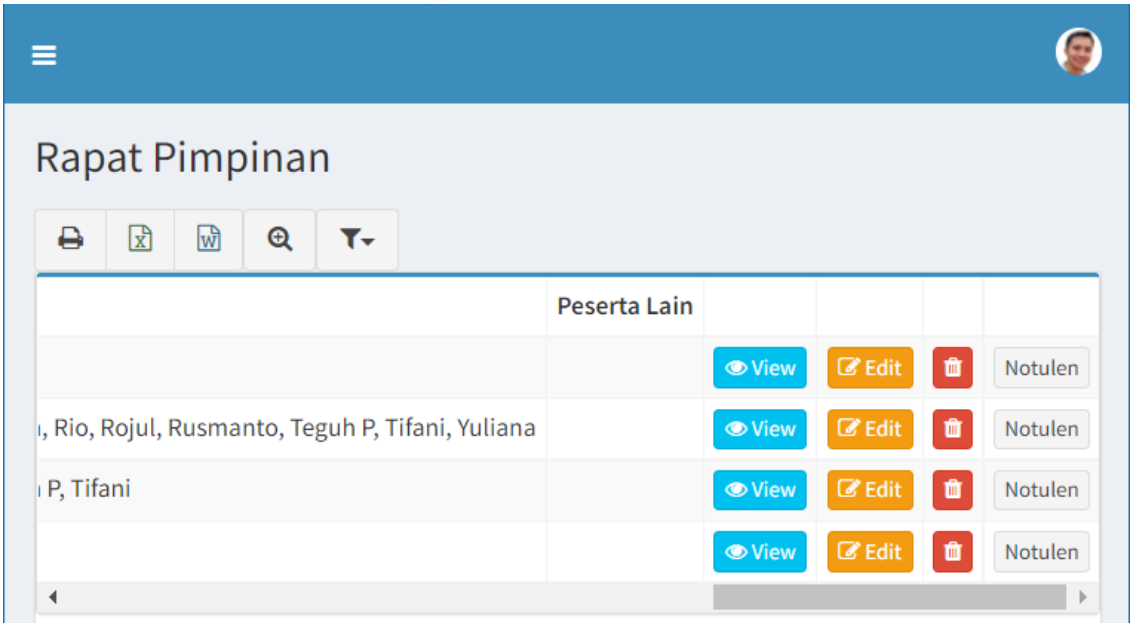
1. Pilih Tanggal Rapat
2. Pilih Jenis Rapat
3. Pilih Oleh (PJ rapat)
4. Isikan Tempat Rapat
5. Pilih nama Pimpinan Rapat
6. Pilih nama Notulis Rapat
7. Ceklis nama para Peserta Rapat
8. Isikan nama Peserta lain (jika ada)
9. Upload Lampiran (jika ada)
10. Isikan Link rekaman Rapat (jika ada)

Klik Add lagi untuk menyimpan *event* Rapat yang dibuat.

D. Melihat Daftar Rapat (Pengguna Satker)

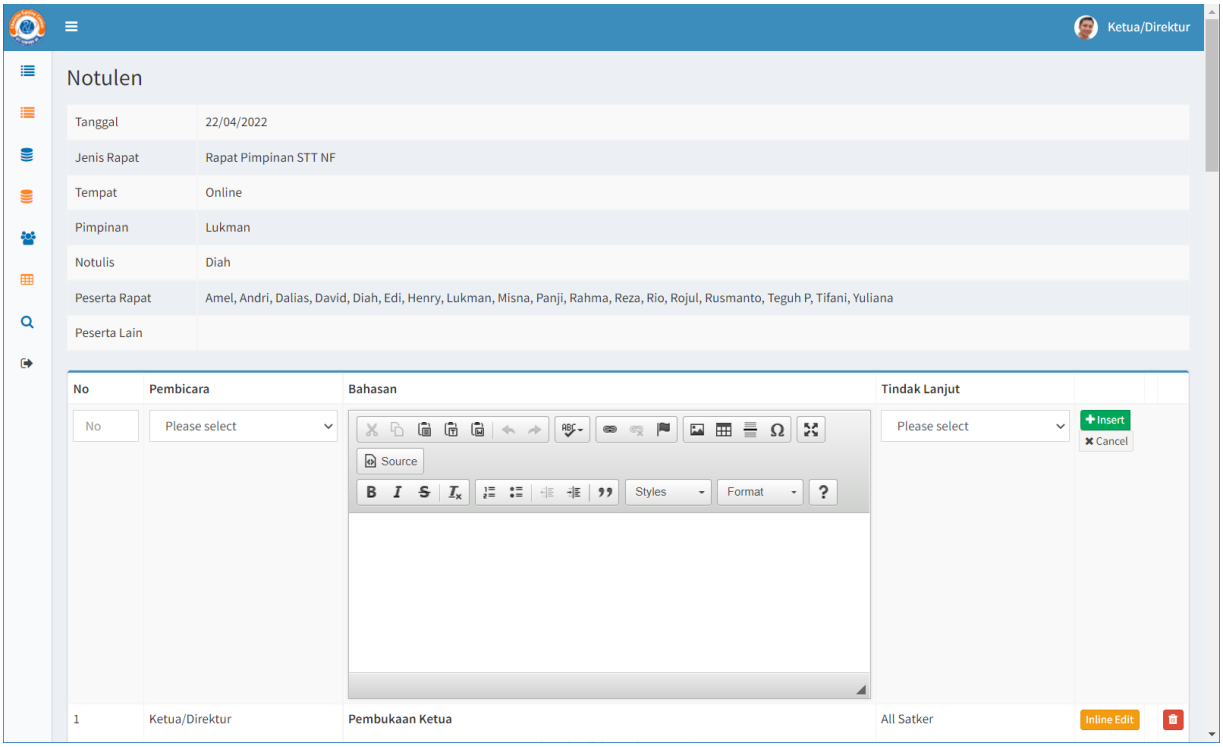
1. Daftar Rapat yang sudah diinput dapat dilihat dari klik di setiap menu jenis Rapat di sebelah kiri.
2. Daftar Rapat menampilkan semua *event* Rapat yang sudah dicatatkan pada sistem
3. Untuk melihat detail Rapat dapat klik tombol View di sebelah kanan baris Rapat yang dimaksud
4. Untuk mengubah detail Rapat dapat klik tombol Edit di sebelah kanan baris Rapat yang dimaksud (hanya bagi Pengguna yang memiliki *privilege*)
5. Untuk mencari/memfilter rapat tertentu berdasatkan tanggal, jenis, atau pimpinan maupun peserta, klik icon kaca pembesar di bagian atas lalu di form pencarian bisa isikan kriteria pencarian.





E. Mengisikan Notulensi Rapat (Pengguna Notulis)

Bagi Notulis, pengisian notulensi rapat dapat dilakukan dengan klik tombol Notulen dari baris Rapat yang dimaksud di Daftar Rapat.



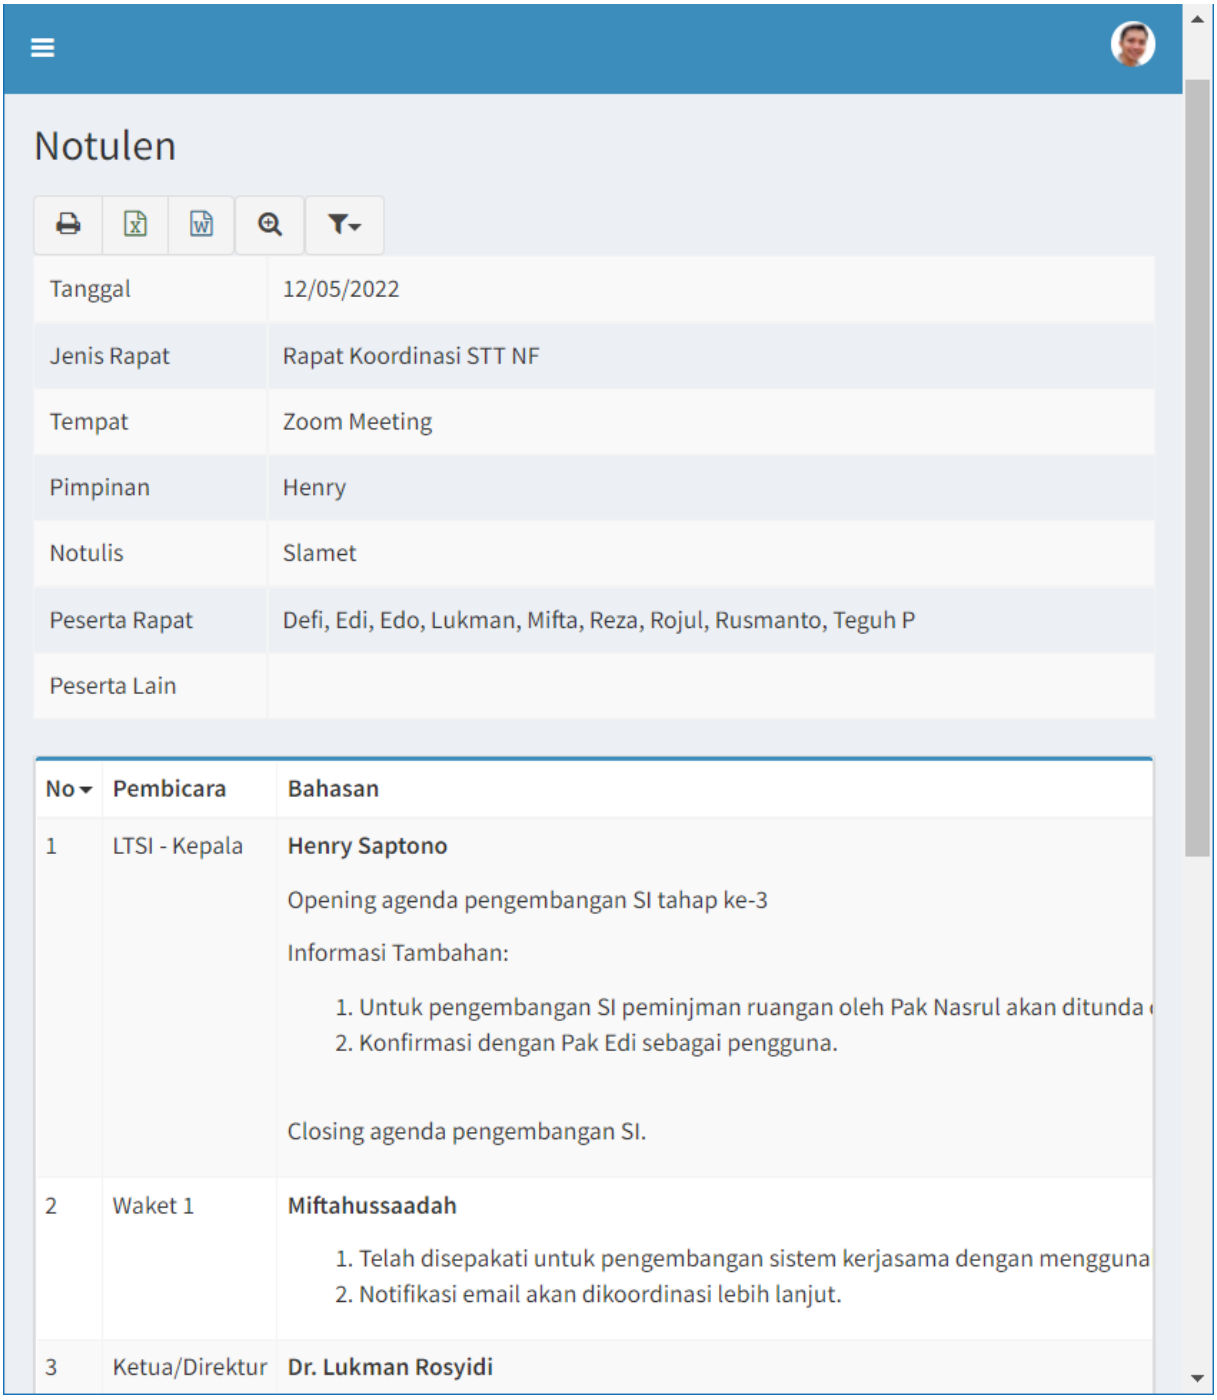
Catatan notulensi rapat dapat ditambah dengan klik Inline Add, meliputi pengisian:

1. No urut
2. Pembicara (Satker)
3. Bahasan
4. Tindak Lanjut (Satker)

Lalu akhiri dengan klik tombol Insert. Ulangi sampai semua nomor bahasan dimasukkan sebagai notulensi rapat.

F. Melihat Notulensi Rapat (Pengguna Satker)

Bagi pengguna satker, melihat notulensi rapat dapat dilakukan dengan klik tombol Notulen dari baris Rapat yang dimaksud di Daftar Rapat.



Untuk mengunduh dan menyimpan notulensi rapat dalam format file Microsoft Word/Excel, pengguna dapat klik icon Microsoft Word/Excel yang ada di bagian atas halaman.

VI. Source Code

Berikut source code aplikasi Sistem Informasi Rapat.

A. Menambah cataatan event rapat (rapat_add.php)

```
